PLACEMENT PREP STARTER

Python + Streamlit Based Smart Learning App

By Student

PROJECT OVERVIEW

- Placement Prep Starter is a smart learning and tracking application
- designed for students and freshers to prepare for campus placements.

- It provides structured learning in:
- • Coding
- • Communication Skills
- • Git & GitHub
- • LinkedIn & Resume

MAIN OBJECTIVE

- • Provide structured 8-week learning roadmap
- • Improve technical & communication skills
- • Track learning progress
- • Provide doubt solving
- • Conduct mock tests

TRACKS IN OUR APPLICATION

- Our app contains 4 main learning tracks:

- 1. Coding
- 2. Communication Skills
- 3. Git & GitHub
- 4. LinkedIn Preparation

- Users can choose any track at any time.

8 WEEK LEARNING PLAN

- Each track contains a complete 8-week structured plan.

- Every week includes:
- • Learning Topics
- • Basic Explanations
- • Practice Tasks
- • Learning Resources
- • Doubt Handling
- • Mock Test

WEEKLY LEARNING FLOW

- User selects:
- Track → Week →

- • Studies concepts
- • Reads explanation
- • Views resources
- • Asks doubts
- • Practices tasks
- • Takes mock test

- Then moves to next week.

CODING 8 WEEK PLAN

- Week 1: Basics of Programming
- Week 2: Variables & Data Types
- Week 3: Conditions & Loops
- Week 4: Functions
- Week 5: Arrays & Lists
- Week 6: Problem Solving
- Week 7: Mini Programs
- Week 8: Revision + Test

COMMUNICATION 8 WEEK PLAN

- Week 1: Self Introduction
- Week 2: Basic English Speaking
- Week 3: Confidence Building
- Week 4: Group Discussion
- Week 5: Presentation Skills
- Week 6: Interview Speaking
- Week 7: Mock Interviews
- Week 8: Final Practice

GIT & GITHUB 8 WEEK PLAN

- Week 1: What is Git & GitHub
- Week 2: Init, Status, Add, Commit
- Week 3: Branches
- Week 4: Merge
- Week 5: Push & Pull
- Week 6: README File
- Week 7: Mini Project Repo
- Week 8: Revision + Test

LINKEDIN 8 WEEK PLAN

- Week 1: Profile Creation
- Week 2: Headline & Summary
- Week 3: Skills Section
- Week 4: Project Section
- Week 5: Connections
- Week 6: Posts & Activity
- Week 7: Job Search Basics
- Week 8: Profile Review

DOUBT HANDLING SYSTEM

- Users can enter any doubt.
- The system provides AI-based responses.

- This helps students learn better and clear concepts easily.

MOCK TEST SYSTEM

- Every week contains a small mock test.

- • 5 MCQ questions
- • Minimum score required to move next week
- • Improves understanding and confidence

TECHNOLOGIES USED

- • Python – Core logic
- • Streamlit – Web interface
- • Dictionary & Lists – Data storage
- • Functions – Modular coding

ADVANTAGES OF OUR SYSTEM

- • Easy to use
- • Beginner friendly
- • Interactive learning
- • Organized study plan
- • Improves placement readiness

CONCLUSION

- Placement Prep Starter provides a complete learning ecosystem
- for students and freshers to prepare efficiently for placements.

- It helps in skill development, confidence building and career success.
